

Interested in developing algorithms that allow a car to drive itself?

Mobileye Vision Technologies, the technological leader in the area of advanced image processing for automotive applications, is hiring talented Algorithms Developers.

As a part of our leading algorithmic group, you will be exposed to innovative areas of practice and interact with top experts in the field of Computer Vision and Machine Learning.

Work includes development of advanced algorithms in the fields of Image Processing, Computer Vision, Machine Learning, System Design and Coding for a Real-Time environment in C++.

We are facing ambitious and exciting challenges. We would like to offer you the opportunity to join us and make our vision possible!

All positions are located in Har Hotzvim, Jerusalem

Requirements for full-time positions:

- B.Sc. in Computer Science or a similar field with excellent grades (M.Sc./PhD is an advantage)
- Good knowledge of C++
- Familiarity with Matlab
- Background in computer vision and machine learning
- Some experience with industrial software development

Requirements for student positions:

- Excellent students from leading institutions, currently pursuing a B.Sc. or M.Sc. in Computer Science or similar fields
- High GPA
- Good programming abilities in C/C++
- Availability to work 50%-60% position
